Challenge *And* Solution

CHALLENGE

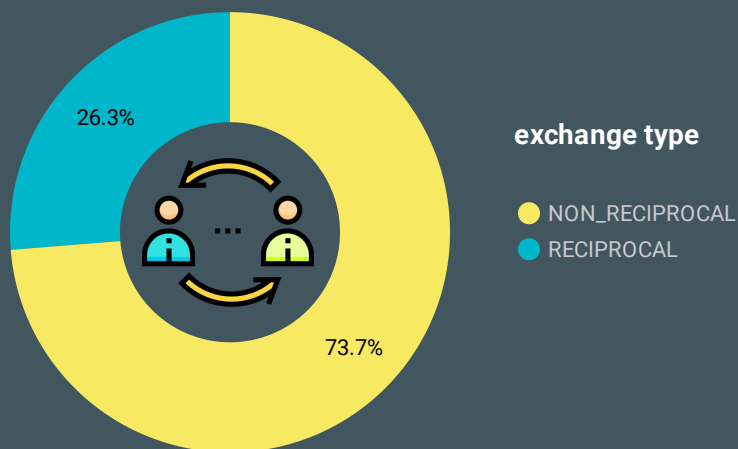

**WE NEEDS TO UNDERSTAND
WHY SOME OF THEIR
CUSTOMERS LEAVE**

SOLUTION

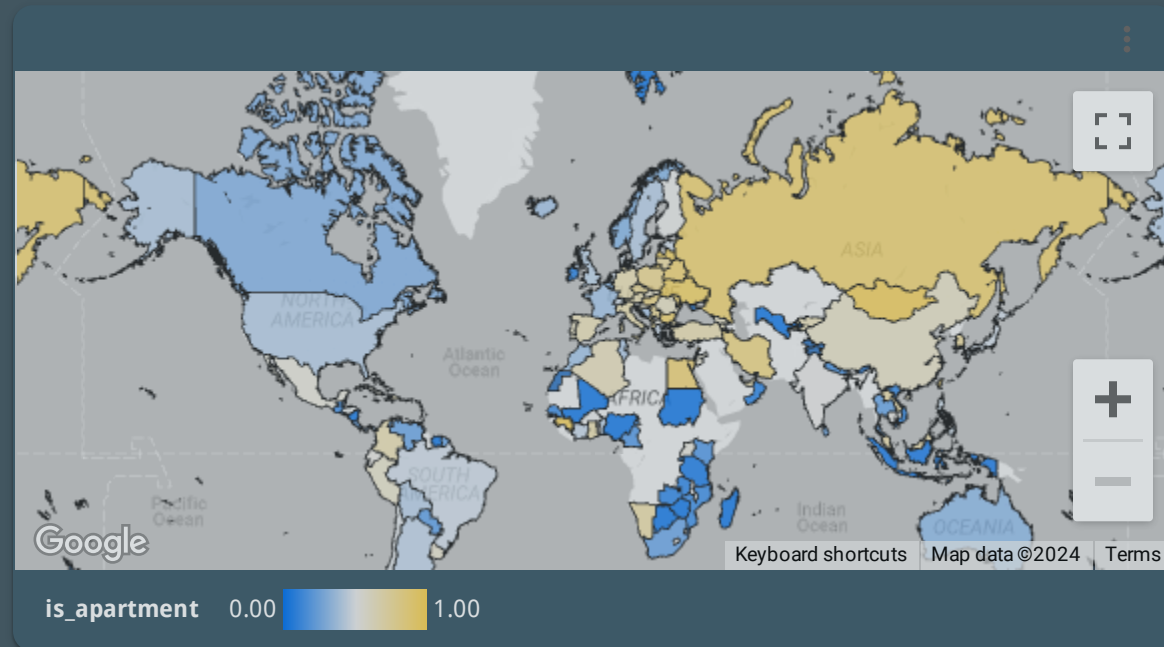

**AFTER ANALYSIS, WE
DISCOVERED THAT THE COVID 19
IS ONE OF THE REASONS FOR THE
LOSS OF SUBSCRIPTIONS**

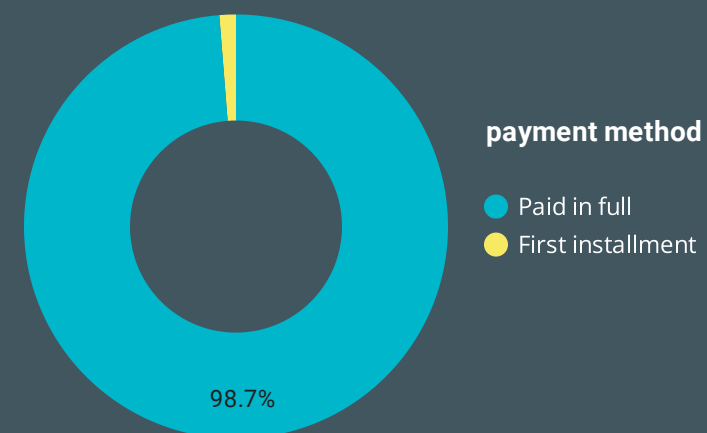

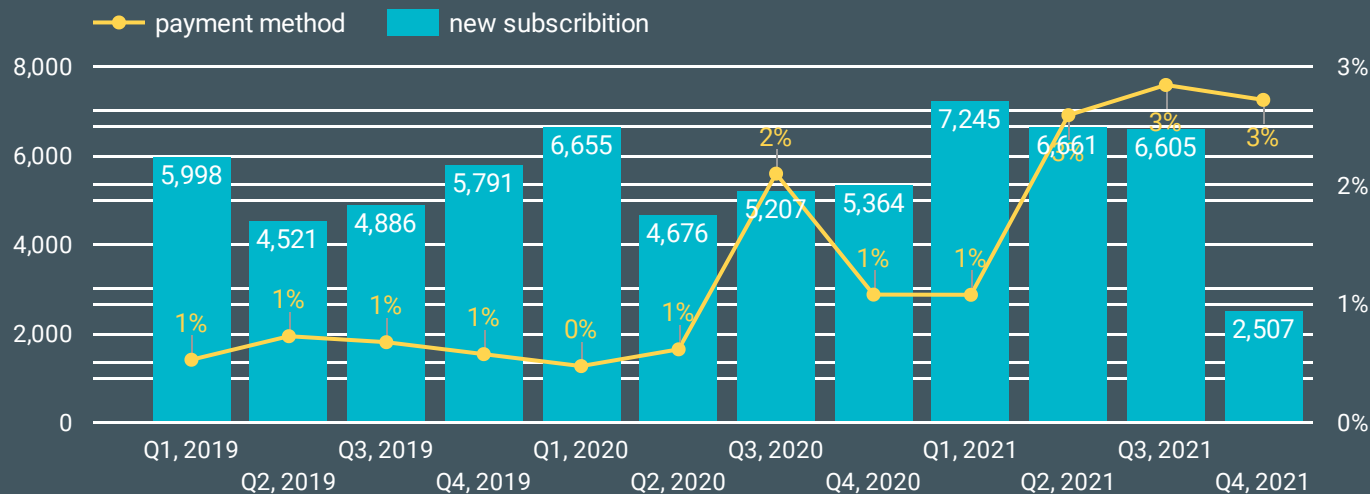

Total of users depend on the exchange type

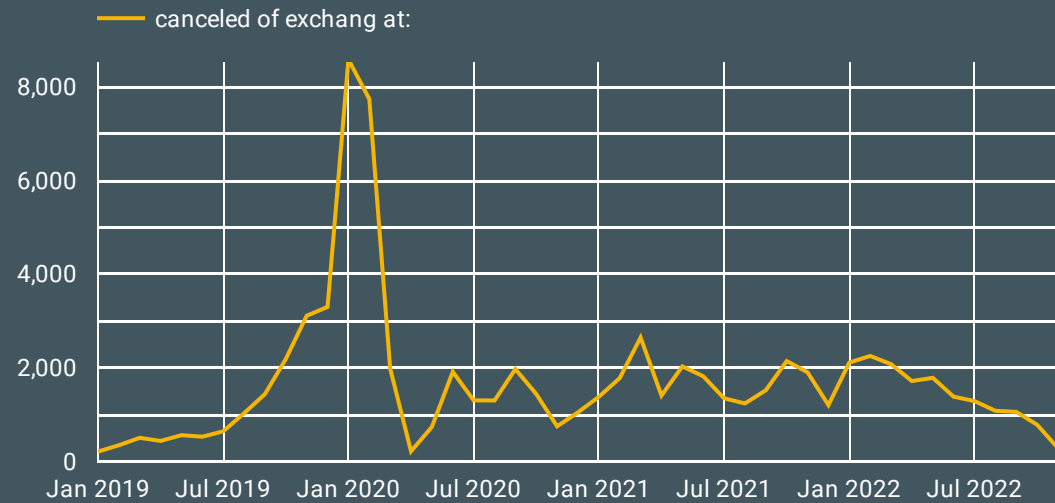

In this map, we see the different countries based on types of homes .

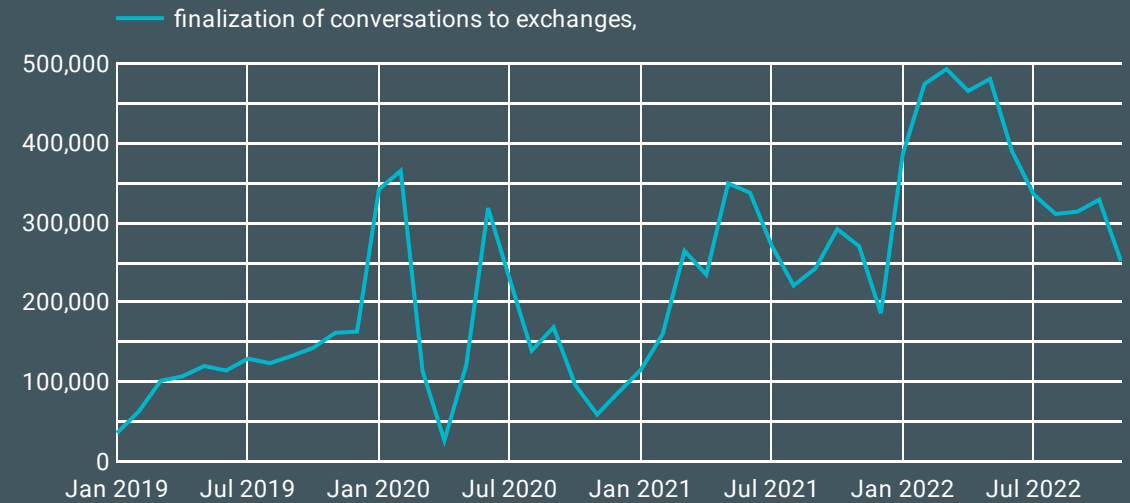

Customers are picking up on payment in installments

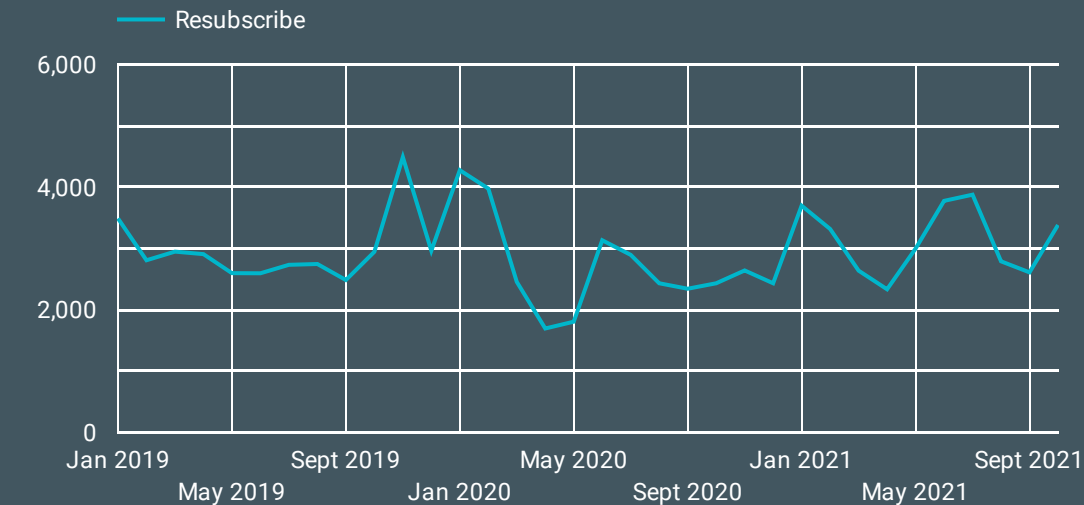

We saw peaks in cancellation in Jan and Feb 2020, clearly showing the Covid impact on our business.

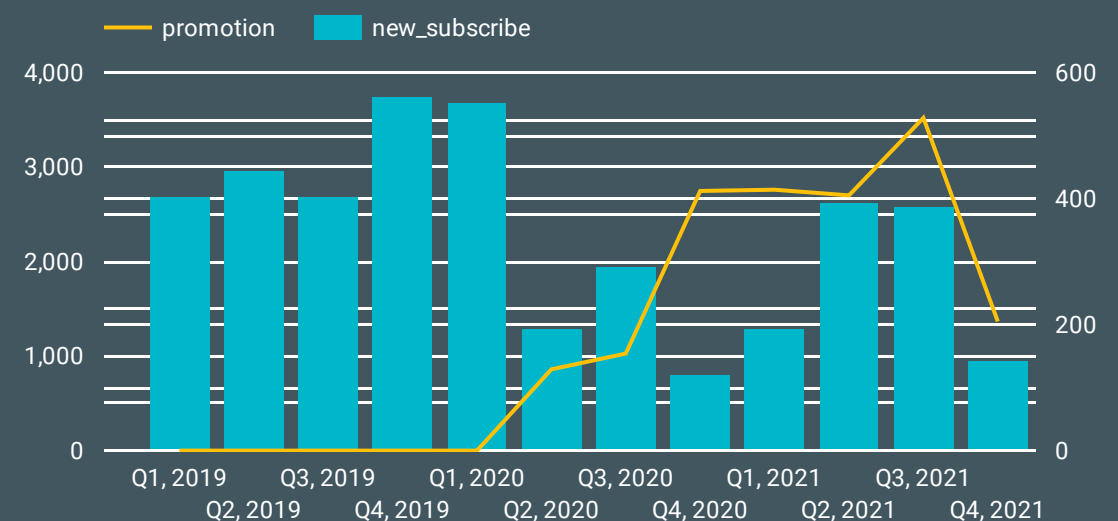

Similar in the finalization conversations that lead to exchanges, where drops starting Feb 2020.

We saw a decrease in re-subscriptions in February and March 2020, Covid clearly shows Impact on our business.

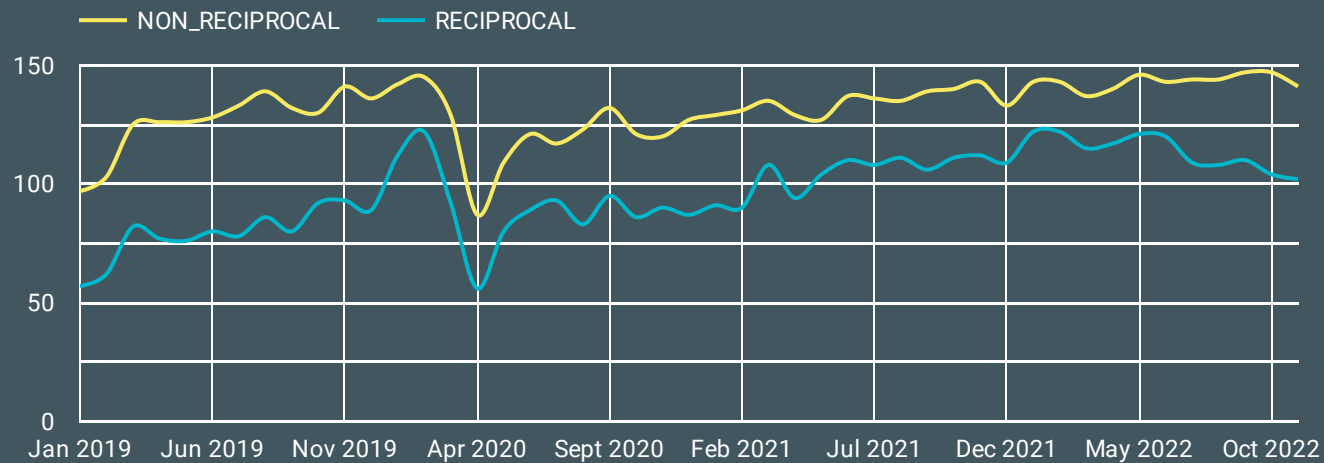

We see that the number of new customers is increasing once we push promotion starting Q4 2020.

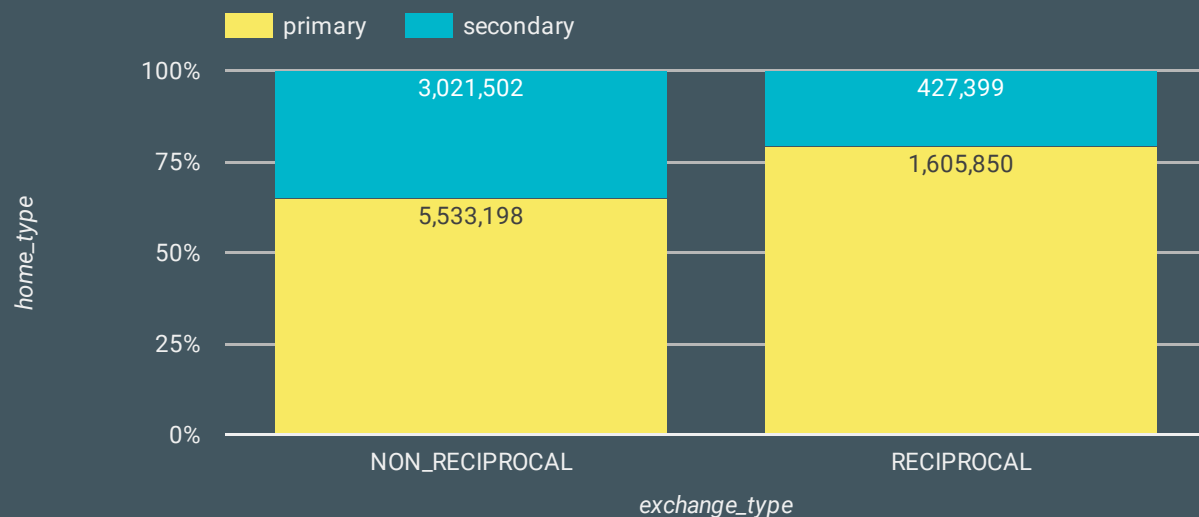

Hypothesis testing

1- The impact of the Covid19 on the type of exchange in general

We saw a decline in April and May 2020, which clearly shows the impact of Covid on our business. It will be clear in 2021, but it is still higher compared to what it was before Covid-19.

2-Is there a relationship with the exchange type of by non_reciprocal exchange with which is more in residence type by secondary?

We have seen that the secondary home is more in non-exchange.
